

THE FINANCE PLAYBOOK

How the finance function runs — every control, cycle and rule.

The systems, controls, delegations and rhythms that keep the finance function accurate, compliant and trusted — in one place.

3

roles, one chain

Xero

sole source of truth

12-month

compliance calendar

What's in this playbook

Four parts: how the function runs, what each person owns, the working checklists, and the reference standards — controls, delegations and policy — that keep it consistent.

01 The operating manual

- | | |
|---|---------------------------------------|
| 1.1 Purpose of this playbook | 1.7 Operating philosophy & escalation |
| 1.2 The finance function at a glance | 1.8 Operating rhythm |

HOW TO USE THIS PLAYBOOK

Read part one once, together, so the whole team shares the same picture. Keep part two close — it is the day-to-day reference for what you own, what you may decide, and when to escalate.

CONTROLLED DOCUMENT

No changes are permitted without the express consent of a Director. Reviewed at least annually and re-issued — never changed on the run.

01

The operating manual

The shared picture — the purpose of the function, the systems and controls that govern every transaction, the delegations that bound it, and the cycles that keep it compliant and predictable.

Purpose of this playbook

This playbook provides a clear, transparent and consistent framework for the financial management of the business — one that complies with statutory obligations and the requisite Philippine Accounting Standards, and removes ambiguity from how finance work is done.

Finance work fails when it relies on memory or on any one person holding the whole process. This playbook replaces that with structure: defined systems, separated duties, bounded authorities and a predictable calendar — so the numbers are accurate, the controls hold, and nothing compliance-critical is ever a surprise.

WHO IT APPLIES TO

The whole finance function — the General Manager – Corporate, the Accountant and the Accounting Assistant — and anyone who logs into the financial systems or exercises a financial delegation.

WHEN YOU MAY DEVIATE

Only where a Director authorises it, or where statutory compliance requires it. Controls and separation of duties are never bypassed for convenience; every exception is documented and reviewed.

A CONTROLLED DOCUMENT

No changes are permitted without the express consent of a Director. It is reviewed at least annually and re-issued — never amended on the run. Last full review and endorsement sit with the Board.

THE AIM

Make finance predictable, auditable and trusted — so good financial outcomes don't depend on any one person remembering the right thing at the right moment.

The finance function at a glance

A small team, one chain of accountability. The finance function manages the financial administration of Brainsource Corporation — the Philippine operations of Brainbox Group — under Philippine Accounting Standards, accountable through the General Manager – Corporate to the Board.

ENTITY	Brainsource Corporation · Brainbox Group (Philippine operations)
LED BY	General Manager – Corporate (the “GM”)
TEAM	Accountant · Accounting Assistant
REPORTS TO	The Board / Directors — Tony & Alexis
REPORTING STANDARD	Philippine Accounting Standards · accrual basis · PHP

THE FUNCTIONS WE DELIVER

- Accounts payable
- Accounts receivable
- Payroll
- Banking & petty cash
- Tax & VAT (BIR)
- Statutory contributions
- Month-end & reporting
- Budget & forecasting
- Assets & capitalisation
- Insurance & investments
- Transfer pricing
- Audit, risk & compliance

Systems of record

A defined set of systems governs every transaction. **Xero is the sole source of truth**; everything reconciles back to it. If a system is wrong, it is corrected before work proceeds — personal records never override it.

Xero

SOURCE OF TRUTH

The financial management system — bills, invoices, GL, bank reconciliation, payslips. Accounts are not added or archived without the GM's approval. System logins require Xero training.

Reach & Frog

REPORTING & CASH FLOW

Reach Reporting (management reporting) and Frog Cash Flow both link to Xero to inform decisions and record operating activity — never a substitute for Xero.

Wise & Metrobank

PAYMENTS & PAYROLL

Metrobank for supplier and statutory payments; Wise for batch payroll to staff accounts via the recipients' template. Payments are authorised, never released alone.

BambooHR

PEOPLE & LEAVE

The source for leave and employee details feeding payroll. The Employee Masterlist and Fortnight Payroll Template (Excel) sit alongside it for pay calculation.

OneDrive

DOCUMENT STORE

Receipts and supporting documents, stored to the standard naming format YYYYMMDD-Supplier-Summary-Amount and attached to the Xero bill.

Asana

AUDIT FINDINGS

Material audit findings are tracked to closure in an Asana audit project, with closed findings reported periodically to the Board.

THE RULE

Everything reconciles to Xero. Other tools inform and support, but the books are the books — one source of truth, kept current and trusted.

Financial controls & separation of duties

Separation of duties is the principle that no single person controls an end-to-end process. It gives the function a system of checks and balances — process integrity with proper security and quality control.

Operation vs record

Separate operational responsibility from record-keeping responsibility — the person who acts is not the only person who records.

Admin vs audit

Separate system administration from system auditing, and system ownership from certification — so review stays independent.

Prepare vs approve

The person who prepares a payment is not the person who approves or authorises it. Authorisation follows the delegations (1.5).

HOW A PAYMENT SPLITS ACROSS THE TEAM

Prepare	Review	Approve	Reconcile
Assistant / Accountant	Accountant	GM (per delegation)	Independent reconciler
Draft the bill in Xero with receipt & GL coding.	Check validity, coding and supporting documents.	Approve within authority; escalate beyond it.	Reconcile the bank back to Xero — a separate set of eyes.

REVIEWED, NOT ASSUMED

Separation of duties is reviewed at least annually (and tested in the May separation-of-duties audit) to ensure appropriate, proportionate controls apply to every key system.

Delegations & authorities

The Board authorises others to exercise defined powers within limits. Authority is **vested in a position, not a person**, and the Board remains ultimately accountable. The authoritative source is the *Schedule of Management Authorities*; the key Finance lines are summarised in 4.2.

- 1

Exercise authority in line with the law, company policy and any conditions on the delegation — for a proper business purpose, with no conflict of interest.
- 2

Never approve a transaction you personally benefit from, and never approve beyond your delegated limit — doing so breaches the policy and may constitute misconduct.
- 3

A procurement authority must hold a financial delegation that meets or exceeds the contract’s **aggregate annual value** (base price, recurring fees, usage, likely renewals, variations and taxes other than recoverable VAT).

Board Approves the largest commitments, budgets, investments, auditor and policy. Ultimately accountable.	GM – Corporate Approves operating expenditure and contracts within limits; recommends above them; signs banking.	Accountant Develops, prepares and actions — executes approved payments and prepares data; does not self-approve.
--	---	---

Each action in the register is one of **Develop · Recommend · Approve · Be advised · Ratify · Action** — defined in full in 4.2. When in doubt about your limit, treat it as beyond your authority and escalate.

Confidentiality & information security

Finance handles the most sensitive information in the business — payroll, bank access, director and commercial data. Protecting it is foundational, not optional. Read this section as binding.

THE ABSOLUTE RULE

Payroll, banking and all personal data relating to staff and the directors is **highly confidential** and is not shared with any other party — including those who claim a “right to know”.

If anyone presses for salary, payment or personal financial information, the answer is a polite decline and an escalation to the GM or a Director. Gossip about pay or finances is strictly prohibited; unauthorised disclosure will be treated as Serious Misconduct.

Credentials & access

Strong, unique passwords and MFA on Xero, Wise, Metrobank and email. Credentials are never shared; banking authorisation stays with the authorised person only.

Screen & document handling

Lock screens when away; keep payroll and bank data off personal devices; store records only in approved locations (Xero, OneDrive). Clean desk; no sensitive print-outs left out.

Fraud & payment safety

Verify any change to supplier or staff bank details independently before paying. Be alert to invoice and email fraud; when a request feels off, pause and confirm through a known channel.

SERIOUS MISCONDUCT

Unauthorised disclosure of confidential financial or personal information will be treated as **Serious Misconduct**. If unsure whether something may be shared, say nothing and ask a Director first.

Operating philosophy & escalation

A few principles sit under every finance decision. They explain why the controls and cycles are shaped the way they are — and how an issue should move.

Accuracy first

The books are right before they are fast.
Reconcile, check and support every figure; correct the system before proceeding.

Controls hold

Separation of duties and delegations are never bypassed for speed. A control skipped once becomes a control gone.

Compliance on time

Statutory dates are immovable. The calendar is worked ahead of time, never caught up to after a deadline.

HOW AN ISSUE MOVES

Step 1	Step 2	Step 3	Step 4	Step 5
Spotted	Logged	Assessed	Resolved or raised	Closed
A discrepancy, error or risk is noticed in the books or a process.	Captured with detail — in Xero notes or the Asana audit project.	Accountant judges materiality & whether it's within authority.	Fixed within authority, or escalated to the GM — and to the Board if material.	Closed on confirmation; root cause addressed so it doesn't recur.

ESCALATE EARLY

Anything beyond delegated authority, anything material, or anything touching fraud or a Director's finances is raised at once — with the facts and the options, not just a question.

Operating rhythm

Finance runs to fixed cycles. Pay runs are fortnightly; statutory remittances and VAT are monthly; budgets, tax and audit fall across the quarter and year. The calendar is the spine (1.9).

Daily	Process bills & receipts into Xero, reconcile bank items, monitor cash, action AP/AR as they arise.
Fortnightly	Payroll run (Wednesdays). Reimbursement claims drafted Monday of pay-run week; paid on pay date.
Monthly	Month-end close & End of Month report; bank reconciliation; recurring payments; SSS, PhilHealth, HDMF, HMO, withholding tax and VAT remittances.
Quarterly	Quarterly VAT and income tax; bi-monthly operating-budget updates and forecasts; HMO & aircon maintenance cycles.
Annual	Annual income tax & audited financial statements, annual budget, business-permit & BIR renewals, GIS, insurance renewals, and the five scheduled audits.

PAY RUN

Fortnightly, on Wednesdays. Claims arrive in a single email at least three days before; payslips issue via Xero and pay releases via Wise.

LOCKED, THEN WORKED

Each cycle has an owner and a date in Xero/Asana. Recurring payments follow the fixed schedule in 4.3 — no statutory date is missed.

Compliance calendar

Six statutory items recur **every month** — PhilHealth, HDMF (Pag-IBIG), HMO, SSS, withholding tax and VAT. The items below sit on top, by month. Dates are immovable; work ahead of them.

Jul Statutory Compliance Audit (ext) · Lease Renewal (II)	Aug Monthly statutory items only	Sep Reimbursements/Claims Audit · Annual ITR · Annual Board Meeting · Audited FS (prior yr)
Oct Quarterly VAT & income tax · GIS	Nov Banking Reconciliation Audit · Lease Renewals (I & II)	Dec Income tax
Jan Quarterly VAT & income tax · Business Permit Renewal · BIR Registration Fee	Feb Monthly statutory items only	Mar Financial Controls Audit · Business & Fire Insurance (AXA) · GIS Update
Apr Quarterly VAT & income tax	May Separation of Duties Audit · Aircon maintenance	Jun HMO Renewal · income tax

EVERY MONTH, WITHOUT FAIL
PhilHealth (11th–15th) · HDMF (10th–14th) · SSS (25th–end) · HMO · Withholding tax (1601C & 0619E, 10th) · Monthly VAT (20th).
Recurring operating payments follow the schedule in 4.3.

Reporting & assurance

Reporting is factual and timely — it gives the Board a true picture and drives improvement. Assurance comes from a fixed program of audits across the year (4.5).

CADENCE	REPORT	PURPOSE
Monthly	End of Month report	Position & performance for the month, drawn from Xero via Reach Reporting.
Bi-monthly	Operating budget update & forecast	Budget vs actual and a refreshed cash-flow forecast (Frog).
Quarterly	Compliance & risk review	Statutory lodgements confirmed; risk reviewed; audit findings tracked.
Annual	Audited financial statements	External audit, annual ITR and statements presented to the Board.

FACTUAL & NEUTRAL

Reports state the position plainly — no spin. Exceptions and risks are surfaced clearly so the Board can act early.

FINDINGS TO CLOSURE

Material audit findings are tracked in the Asana audit project; closed findings are reported back to the Board.

Non-negotiable rules & outcome

- 1** Xero is the sole source of truth — everything reconciles to it; accounts change only with the GM's approval.
- 2** Separation of duties holds — no one person prepares, approves and reconciles the same payment.
- 3** No one approves beyond their delegated limit, or where they personally benefit — doing so may constitute misconduct.
- 4** Statutory dates are never missed — the compliance calendar is worked ahead of every deadline.
- 5** Payroll, banking and personal financial data are confidential — never disclosed; unauthorised disclosure is Serious Misconduct.
- 6** The Finance team reviews this playbook every quarter and gives the Board assurance of completion; it changes only with a Director's express consent and is re-issued — never amended on the run.

OPERATING OUTCOME

This playbook exists to make finance trustworthy.

When it is followed, the numbers are accurate, the controls hold, compliance is never late, and the Board can rely on what it sees. Predictable finance builds trust — and trust is what lets the business move with confidence.

02

Duty statements

What each person owns — their purpose, the decisions they may make, and when to escalate. Three roles, one chain of accountability through the General Manager – Corporate to the Board.

General Manager – Corporate

The control & accountability authority for the finance function

REPORTING LINE

The Board / Directors

PATTERN

Full-time

SCOPE

The whole finance function

The GM – Corporate holds firm control over the finance function — ensuring the books are accurate, controls hold, compliance is on time and the Board can trust what it sees. The role is accountable for outcomes and integrity, approves within delegated authority, and is the escalation point for the team.

WHAT GREAT LOOKS LIKE

The function runs quietly and correctly — clean audits, no missed statutory dates, no control breaches, and a Board that is never surprised. The team is clear, capable and well-separated in their duties.

Control & approvals

Approve expenditure, contracts & payments within delegation; recommend above it; govern the chart of accounts.

Compliance & treasury

Oversee statutory lodgements & BIR payments; sign banking; recommend budgets & investments to the Board.

Reporting & audit

Present monthly & annual reporting; recommend the auditor; ensure findings are tracked to closure.

Team & controls

Lead the Accountant & Assistant; uphold separation of duties; own the quarterly playbook review & Board assurance.

MAY

Approve expenditure & contracts within limits
Sign banking & authorise payments
Recommend budgets, investments & auditor to the Board
Approve chart-of-accounts changes

MAY NOT

Approve beyond delegated limits or own benefit
Bypass separation of duties
Commit the Board's reserved matters alone
Amend this playbook without a Director's consent

PERFORMANCE IS MEASURED BY

Accurate books, clean audit outcomes, on-time compliance, no control breaches, and Board confidence in the numbers.

NON-NEGOTIABLE

Controls hold · delegations respected · confidentiality absolute · compliance never late.

Accountant

The execution & integrity engine of the books

REPORTING LINE

GM – Corporate

PATTERN

Full-time

FOCUS

Close, payroll & reconciliation

The Accountant keeps the books accurate and the cycles on time — running month-end close, payroll, reconciliations, VAT and statutory preparation. The role prepares and actions; it does not self-approve payments, and works strictly within separation-of-duties controls.

WHAT GREAT LOOKS LIKE

The books reconcile cleanly and on time, payroll is always correct and on date, VAT and contributions are prepared ahead of deadline, and every figure is supported — ready for audit at any moment.

Month-end & reconciliation

Run the close, reconcile bank & balance sheet, and prepare the End of Month report from Xero.

Payroll

Run fortnightly payroll — masterlist, leave from BambooHR, payslips in Xero, batch payment via Wise.

Tax & statutory

Prepare VAT, withholding tax, SSS, PhilHealth & HDMF; action BIR & government payments on approval.

AP, AR & budget

Draft bills & invoices, manage AR collection, develop the budget & update operating forecasts.

MAY

- Prepare & action payments once approved
- Run payroll & issue payslips
- Prepare statutory lodgements & reconciliations
- Develop the budget & forecasts

MAY NOT

- Approve own payments or beyond authority
- Add or archive Xero accounts without the GM
- Release banking without authorisation
- Disclose payroll or personal data

PERFORMANCE IS MEASURED BY

Clean, on-time reconciliations; accurate payroll; statutory items prepared ahead of deadline; audit-ready support for every figure.

NON-NEGOTIABLE

Prepare, don't self-approve · reconcile to Xero · never miss a statutory date.

Accounting Assistant

Accurate capture, clean records & reliable support

REPORTING LINE

Accountant · GM – Corporate

PATTERN

Full-time

FOCUS

Data entry, AP & records

The Accounting Assistant keeps the source data clean and complete — capturing bills, receipts and reimbursements accurately into Xero, maintaining orderly records, and supporting the Accountant through the cycles. The role provides the first half of every separated process: prepare and record, never approve.

WHAT GREAT LOOKS LIKE

Every bill and receipt is captured promptly, coded correctly and supported by a properly named document; records are tidy and findable; and the Accountant never has to chase missing detail.

AP & data entry

Draft bills in Xero on delivery, code to the GL, and attach correctly named receipts from OneDrive.

Receipts & reimbursements

Check and record employee expense claims as bills for the pay-run, with valid supporting receipts.

Petty cash & filing

Maintain petty cash records and keep documents filed to the standard so anything is found in seconds.

Cycle support

Support payroll, month-end and audit by preparing data accurately and on time for the Accountant.

MAY

- Draft bills & record transactions in Xero
- Check & record reimbursement claims
- Maintain petty cash & records
- Prepare data to support the cycles

MAY NOT

- Approve or authorise any payment
- Run payroll or release funds
- Change Xero accounts or master data
- Disclose payroll or personal data

PERFORMANCE IS MEASURED BY

Prompt, accurate capture; correct coding; complete supporting documents; tidy records; reliable support through every cycle.

NON-NEGOTIABLE

Capture accurately · record, never approve · confidentiality absolute.

Separation of duties & competency

Who does what across a transaction — and who must *not* do it too. No single person prepares, approves and reconciles the same payment. Reviewed at least annually and tested in the May audit.

ACTIVITY	ASSISTANT	ACCOUNTANT	GM – CORP
Draft bills & capture receipts	Prepare	Review	—
Approve payment	—	—	Approve*
Release / authorise in bank	—	Execute	Authorise
Run payroll	Support	Run	Approve
Bank reconciliation	—	Reconcile	Review
Chart of accounts change	—	Recommend	Approve

COMPETENCY & TRAINING

Anyone logging into the financial system (other than for approvals or authorisations) must have completed the required Xero training. Competency is reviewed with the annual separation-of-duties review.

* WITHIN DELEGATION

The GM approves only within their delegated limit; amounts above it are recommended to the Board. Approval and the bank authorisation that follows never rest with the person who prepared the payment.

03

Checklists

Tick and sign. These are the working checklists behind the cycles in part one — carried out on the ground, then recorded in Xero.

3.1 Month-end close

3.2 Fortnightly payroll run

3.3 AP & payment run

3.4 Monthly statutory & VAT compliance

Month-end close

Close the month cleanly so the End of Month report is accurate and audit-ready. Everything reconciles to Xero.

CAPTURE & RECONCILE

- ☐ All bills & invoices entered for the period
- ☐ All receipts attached & correctly coded
- ☐ Bank reconciled to Xero for every account
- ☐ Petty cash counted & reconciled
- ☐ Credit-card transactions billed & reconciled

SIGN-OFF

- ☐ Reconciliations reviewed independently
- ☐ Report reviewed & approved by the GM
- ☐ Period locked in Xero

ADJUST & REVIEW

- ☐ Accruals, prepayments & depreciation posted
- ☐ Intercompany / transfer-pricing invoice raised
- ☐ Balance-sheet accounts reviewed & supported
- ☐ Budget vs actual variances explained
- ☐ End of Month report prepared (Reach)

ALWAYS

- ☐ Separation of duties maintained
- ☐ Every figure supported & audit-ready

PERIOD

PREPARED BY

APPROVED (GM)

Fortnightly payroll run

Run on Wednesdays. Work it in order so pay is accurate, on time, and properly approved before release.

PREPARE

- ☐ Duplicate latest payroll sheet; name to pay-period end
- ☐ Update from Employee Masterlist (new hires / changes)
- ☐ Extract leave from BambooHR; plot into template
- ☐ Plot holidays & premiums (100% regular / 30% special)
- ☐ Calculate gross, deductions, contributions & net

PROCESS & PAY

- ☐ Build pay run in Xero; match the payroll template
- ☐ Review & finalise; GM approves the run
- ☐ Confirm any bank-detail change independently
- ☐ Populate & import Wise recipients' template
- ☐ Submit batch; send payslips via Xero

STATUTORY CHECK

At the first cut-off of the year, check for updated government contribution tables. Ensure staff deductions equal the remittances submitted (SSS, PhilHealth, HDMF, withholding tax).

PAY PERIOD

PREPARED BY

APPROVED (GM)

AP & payment run

From invoice to reconciled payment — prepared by one person, approved by another, authorised in the bank, then reconciled. No step is skipped or combined.

RECEIVE & RECORD

- ☐ Receive invoice on delivery of goods/services
- ☐ Confirm goods/services received & in good order
- ☐ Save receipt to OneDrive (standard naming)
- ☐ Draft bill in Xero; code to GL; attach receipt
- ☐ Submit the bill for approval

APPROVE, PAY & RECONCILE

- ☐ GM approves within delegation (escalate if above)
- ☐ Verify payee bank details independently
- ☐ Process payment in Metrobank; authorise
- ☐ Save the OR; notify the vendor
- ☐ Reconcile the payment to Xero (separate person)

REIMBURSEMENTS

Claims arrive in a single email at least three days before the pay run; check validity, draft bills on the Monday of pay-run week, and pay on the pay date with the rest of the batch.

PAYEE & REFERENCE

PREPARED

APPROVED

Monthly statutory & VAT compliance

The six monthly lodgements that must never be late. Prepare ahead, remit by the due date, and file the proof.

CONTRIBUTIONS

- ☐ Withholding tax — 1601C & 0619E (by 10th)
- ☐ HDMF / Pag-IBIG (10th–14th)
- ☐ PhilHealth (11th–15th, EPRS)
- ☐ SSS (25th–end)
- ☐ HMO premium

TAX & PROOF

- ☐ Monthly VAT declaration (by 20th)
- ☐ Reconcile deductions to remittances
- ☐ GM reviews & approves remittances
- ☐ File confirmations & ORs to OneDrive
- ☐ Record payments & reconcile in Xero

DON'T FORGET THE QUARTER

Quarterly VAT (25th, Oct/Jan/Apr/Jul) and quarterly income tax (15th, Oct/Jan/Apr) sit on top of the monthly run — check the compliance calendar (1.9) at the start of every month.

MONTH

PREPARED BY

APPROVED (GM)

04

Reference

The standards that keep it all consistent — service standards, the delegations register, recurring payments, accounting policy, the audit program, and how this document is controlled.

4.1 Service standards

4.2 Delegations & authorities register

4.3 Recurring payments schedule

4.4 Significant accounting policies

4.5 Audit program

4.6 Document control

Service standards — what great looks like

These qualitative standards apply across the whole function. They describe the bar the finance team holds — not targets, but how the work should always feel to the Board and everyone it touches.

Accurate

Figures are right the first time and reconcile to Xero. Every number is supported and audit-ready without a scramble.

On time

Pay runs, remittances and lodgements land on or before the date — the calendar is worked ahead, never caught up to.

Controlled

Separation of duties and delegations hold every time. Controls are never traded away for speed or convenience.

Discreet

Payroll, banking and personal data are held in absolute confidence; security is instinctive (see 1.6).

Compliant

Work follows Philippine Accounting Standards and statutory obligation — correct, not just convenient.

Kind & clear

Plain, helpful communication with staff, suppliers and the Board. Firm on controls, warm in manner. *Always Be Kind.*

THE SINGLE MEASURE

The Board trusts the numbers without re-checking them, the auditor finds no surprises, and no statutory date is ever missed. Trust in the books is the measure of the function.

Delegations & authorities register

Key Finance lines from the *Schedule of Management Authorities* (the authoritative source). Thresholds are in PHP and based on a contract’s aggregate annual value.

DECISION	BOARD	GM	ACCOUNTANT
Asset purchase < Php40,000	—	Approve	—
Asset purchase < Php500,000	Advised	Approvet	—
Asset purchase > Php500,000	Approve	Recommend	—
Contracts < 1yr or < Php250,000	Advised	Approve	Action
Contracts > 1yr or > Php250,000	Approve	Recommend	—
Annual budget	Approve	Recommend	Develop
Operating expenses (payment)	Approve	Action	Develop
Open / close bank accounts	Ratify	Approve	Recommend
BIR & other government payments	Review	Approve	Action
Internal audit (annual)	Approve	Advised	Action

WHAT THE ACTIONS MEAN

Develop prepare/draft · **Recommend** put to next level · **Approve** decide & activate · **Be advised** informed after · **Ratify** confirm a prior approval · **Action** carry out the approved task

† & THE RULE

† GM approves if within budget. Authority is vested in a position, not a person; never approve beyond your limit or where you benefit. The full register is the Schedule of Management Authorities.

Recurring payments schedule

The standing payments of Brainsource Corporation, by cycle. Dates are the day of the month (or window) each is due.

MONTHLY

Withholding taxes (1601C & 0619E)	10	HDMF (Pag-IBIG)	10–14
PhilHealth	11–15	SSS	25–31
Monthly VAT	20	TL Plaza rent	1–5
Hensonville property payment	28	Water (TL) · Electric · Converge	20
Shuttle service	28–31	Office cleaner	Alt. Fri

QUARTERLY

Quarterly VAT	Oct / Jan / Apr / Jul 25
Quarterly income tax	Oct / Jan / Apr 15
HMO	Jul
Aircon maintenance	May / Aug / Nov

ANNUAL

Annual income tax	Oct 15
Business permit & BIR reg. fee	Jan
Insurance — business & fire (AXA)	Mar
HMO renewal	Jun

Windows shown are the standard due dates; the Hensonville payment must clear before the 1st. Confirm exact dates against the current BIR and provider schedules each period.

Significant accounting policies

A plain-language summary of the policies that govern the books. The authoritative wording lives in the Finance Operations Manual; these are the working essentials.

Basis of preparation

General-purpose statements under Philippine Accounting Standards, on the accrual basis and historical cost — modified where applicable by fair value.

VAT

Revenue, expenses and assets are net of VAT except where not recoverable from the BIR. The net VAT due to/from the BIR sits in payables/receivables.

Fixed assets & capitalisation

Carried at cost (or fair value) less depreciation. Equipment under the capitalisation threshold (~\$1,000) is expensed and held on an asset inventory listing instead.

Depreciation

Straight-line over useful life from the date ready for use; rates, residuals and useful lives reviewed each reporting period.

Receivables & payables

Receivables reviewed for collectability; uncollectible debts written off when identified. Trade payables are unsecured and normally paid within 30 days.

Employee benefits & leases

Benefits provided for as services are rendered. Finance leases capitalised; operating-lease payments expensed over the term.

Current vs non-current is judged on the 12-month operating cycle. Figures are rounded to the nearest dollar; the chart of accounts changes only with the GM’s approval.

Audit program

Controls are tested on a fixed schedule, in a spirit of collaboration and improvement. Findings are tracked to closure in Asana and reported to the Board.

AUDIT	TYPE	WHEN
Financial controls	Internal	March
Separation of duties	Internal	May
Statutory compliance	External	July
Reimbursements & expense claims	Internal	September
Banking reconciliation	Internal	November

HOW AN AUDIT RUNS

Scope Draft scope; Board endorses.	Conduct Run or commission to the template.	Report Present the report to the Board.	Track Findings to closure in Asana.
--	--	---	---

Document control

A controlled document and a living one — reviewed on a strict quarterly cycle by the Finance team, with completion assurance to the Board, and re-issued as the function evolves.

QUARTERLY REVIEW OBLIGATION

The Finance team must review this playbook every quarter to confirm it remains current — and provide assurance of completed review to the Board.

No changes are made without the express consent of a Director. Reviews are logged; changes are re-issued, never made on the run.

DOCUMENT	Finance Playbook — Brainsource Corporation
EDITION	Edition 1 · 2026 — first iteration
OWNER	General Manager – Corporate
REVIEW	Quarterly by the Finance team; assurance to the Board
ENDORSEMENT	Board of Directors
CLASSIFICATION	Internal — controlled document

05

Process maps

Standard, at-a-glance process maps for the most common finance functions across the group — the shape of each process, end to end. The detailed steps live in the checklists and the Finance Operations Manual.

5.1 Australian payroll (Xero)

5.2 Australian BAS, PAYG, FBT & company tax

5.5 Brainbox monthly Gantt

5.7 Brainsource monthly Gantt

5.3 Philippine compliance

5.4 Philippine payroll

5.6 Blue Zoo monthly Gantt

Australian payroll in Xero

Each pay cycle in Xero Payroll — from confirming employee data to filing Single Touch Payroll and paying super. Separation of duties applies: the preparer is not the approver.

KEY DATES

STP filed on/before each payday · super now paid with each pay run, on the same day as payroll · PAYG-W reported on the BAS.

CONTROL

Preparer ≠ approver; bank-detail changes verified independently; pay data held in confidence.

Australian BAS, PAYG, FBT & company tax

Four ATO obligations, the same four-step shape — gather & reconcile, prepare, review & approve, then lodge & pay. Most are lodged through the tax/BAS agent, which extends the due dates shown.

	GATHER & RECONCILE	PREPARE	REVIEW & APPROVE	LODGE & PAY
BAS · GST Monthly / quarterly	Reconcile GST & bank in Xero	Prepare BAS (GST, PAYG-W & instalment)	GM reviews & approves	Lodge & pay ATO · 28th after period
PAYG W'holding & instalment	PAYG-W from STP; confirm instalment rate	Carried onto the BAS	Reviewed with the BAS	Paid with the BAS
FBT Annual · Apr-Mar	Identify fringe benefits provided	Gross-up & calculate taxable value	GM & tax agent review	Lodge & pay · 21 May (later via agent)
Company tax Annual return	Finalise year-end accounts	Tax reconciliation & adjustments	Prepare CTR with tax agent; Board review	Lodge & pay/refund · agent due date

NOTE

Due dates assume lodgement through the registered tax/BAS agent, which generally extends them — confirm each period against the ATO lodgement program. GST & PAYG-W reconcile back to Xero and STP before lodging.

Philippine compliance

Every PH lodgement follows the same five-step shape. Three streams run on it — statutory contributions, tax, and the annual filings. Dates are immovable; the calendar (1.9) drives the month.

Philippine payroll

The fortnightly run for Brainsource — built in the payroll workbook, finalised in Xero, paid through Wise, then remitted to the agencies. Preparer is not the approver.

CADENCE

Fortnightly on Wednesdays. PH regular-holiday premium 100%, special non-working 30% (treated as ordinary days unless also a WA holiday).

CONTROL

Preparer ≠ approver; bank-detail changes verified; payroll data strictly confidential.

Brainbox — monthly Gantt

Every recurring finance task across the month, by day. Solid bars run monthly; pay-run bars in lighter blue. Windows are indicative — confirm against 1.9 and 4.3. Superannuation is paid with each pay run.

Brainbox · monthly

Blue Zoo — monthly Gantt

Every recurring finance task across the month, by day. Solid bars run monthly; pay-run bars in lighter purple. Windows are indicative — confirm against 1.9 and 4.3. Superannuation is paid with each pay run.

Blue Zoo · monthly

Brainsource — monthly Gantt

Every recurring finance task across the month, by day. Solid bars run monthly; outlined bars are periodic (quarterly); dashed bars run as needed. Windows are indicative — confirm against 1.9 and 4.3.

Brainsource · monthly Quarterly As needed

ALWAYS BE KIND

Accurate books, sound controls, trust earned.

Structure is what lets finance be both rigorous and kind — clear systems, separated duties and a steady calendar that protect the business and the people in it. Keep this playbook close, and review it every quarter.
