

Residential building & specialist trades

A one-month prospecting campaign for a Brainbox Associate — targeting WA residential builders, renovators and specialist trade contractors that carry heavy administrative load and tight local labour supply.

CAMPAIGN OWNER

Associate: _____

ISSUED

July 2026 · Ref. BB-DGC-01

ENTRY PRODUCT

Project admin / estimating / scheduling assistant

Campaign at a glance

The Associate carries this campaign for one month and reports achievements at month-end against the targets below. Work the 15 supplied contacts first, then add your own researched targets in the same profile.

15

Priority contacts supplied (verify before outreach)

25–35

Additional accounts the Associate researches & adds

6–10

Qualified appointments for the Commercial Manager this month

1

Industry Insight Article attached to every first touch

How the campaign runs. Work the 15 supplied contacts first, add your own researched targets to reach ~40–50 accounts, and run the four-week cadence in this pack. Every appointment is booked for the Brainbox **Commercial Manager**, recorded in HubSpot, and tagged *Campaign 01 · Residential Building & Trades*.

— Why this industry

THE PRESSURE

Quoting, take-offs, supplier follow-up, project scheduling, variation tracking, invoice chasing and client updates all compete with the work that actually protects margin on site. Owners, supervisors, estimators and project managers absorb this admin themselves because another senior local hire is slow and expensive.

THE OPPORTUNITY

The strongest use case is not replacing site-based people. It is giving the local team reliable support for the recurring work that slows them down between jobs — so throughput improves without adding local overhead. The best entry product is a dedicated project administration, estimating support or scheduling assistant.

MARKET SHAPE

Fragmented at the SME level with no single dominant player — ideal for outreach. **Avoid the major builders** and target **10–80 person builders, renovators and specialist trade contractors** (electrical, plumbing, fabrication and fit-out).

Offshore-suitable roles to lead with

- Estimating support & take-offs
- Procurement admin
- Supplier follow-up
- Job & project scheduling
- Variation tracking
- Maintenance coordination
- CRM updates
- Invoice chasing & job costing
- Client update comms

— Instant Expert

A five-minute brief so you can talk to a residential building & trades prospect like someone who understands their world — not a caller reading a script.

THE LABOUR MARKET THEY LIVE IN

WA residential building and specialist trades have ridden a long demand wave straight into a persistent skills shortage. Competition for licensed tradespeople, supervisors and estimators is intense, and the same shortage extends to the office: good construction administrators, contracts and scheduling staff are hard to find, slow to recruit and expensive to keep.

WHY THE ADMIN LOAD HURTS

Building is a high-transaction, document-heavy business. A single job generates quotes, take-offs, purchase orders, supplier follow-ups, variations, RFIs, compliance paperwork, progress claims, invoices and constant client updates. In a 10–80 person firm there is rarely a deep back office, so it lands on owners, supervisors, estimators and project managers doing admin at night — time not spent winning or pricing work.

THE PRESSURES SHAPING THEIR YEAR

Margins are tight. Years of materials and labour cost inflation, fixed-price contracts signed before costs rose, and well-publicised construction insolvencies have made owners cost-conscious and cautious about fixed overhead. Slow quote turnaround loses jobs, poor supplier follow-up delays sites, and weak invoicing strangles cash flow.

WHERE OFFSHORE SUPPORT FITS

The credible message is separation of work, not replacement of people. Licensed, on-site and client-facing work stays local; the repeatable back-office process work can be handled by a dedicated, trained, supervised offshore team member at a fraction of a local hire — capacity and cash-flow relief, not cost-cutting.

TALK LIKE AN INSIDER

Know the language: take-offs, variations, RFIs, progress claims, retentions, defects, practical completion, PC/PS items. Know the tools: Buildxact, Databuild, Simpro, ServiceM8, procore, Xero, MYOB. Listen first and name the one workflow that clearly hurts most.

— Target profile & selection

Add researched accounts that meet **at least four** of these signals. Verify size and ownership before adding — the model fits owner-led SMEs.

- 10–80 employees, WA-based or meaningful WA office
- Residential builder, renovator, or specialist trade (electrical, plumbing, fabrication, fit-out)
- Owner-led, founder-led or principal-run
- Visible estimators, project coordinators, schedulers or office staff on LinkedIn
- Recently advertised for admin, estimating, scheduling or contracts support
- Uses buildable software (Simplr, ServiceM8, Buildxact, Databuild, Xero, MYOB, procore)
- Growth signals: new projects, display homes, contracts, extra supervisors
- Labour-pressure signals: repeated job ads, long vacancies, "urgent hiring"
- Recurring, process-heavy admin behind on-site delivery

PURSUE

- 10–80 person builders, renovators & trade contractors
- Owner / founder-led businesses
- Firms actively recruiting office or estimating support
- Recurring quoting, scheduling & job-admin load

EXCLUDE

- Major / tier-one builders with shared-service back offices
- Sole traders too small to support a role
- Purely on-site work with no separable admin
- Already in active offshore arrangements (unless reviewing)

— The proposition & angles

Lead with a specific pressure point, not a generic offshore pitch. Match the angle to the person and the trigger.

Pressure point	Angle to lead with
Quote turnaround too slow	Offshore estimating support & take-offs so quotes go out faster without pulling the estimator off pricing.
Supervisors buried in admin	A project administration assistant handling variations, RFIs, supplier follow-up and client updates.
Scheduling bottlenecks	A scheduling assistant coordinating trades, deliveries and maintenance bookings.
Procurement follow-up slipping	Procurement admin chasing suppliers, purchase orders and delivery confirmations.
Cash flow / invoicing lag	Invoice chasing, job-costing support and debtor follow-up to tighten cash flow.
Messy CRM / lost leads	CRM discipline — data hygiene, lead logging and pipeline updates.

Keep it concrete. Prospects respond to one or two named workflows they recognise from their own week — a specific pressure point lands far better than "back-office support".

— Priority prospect list — 15 supplied

First-pass, public-source targets. **Verify in HubSpot, Sales Navigator & Apollo before outreach** — confirm contact, size and fit. Names marked "verify" need a confirmed decision maker first.

Company	Best contact	Why approach
Modular WA	Jason Sjoland, Managing Director	Transportable and modular home builder with project administration, estimating and procurement support potential.
JWH Group	Julian Walter, Managing Director	WA home building group with document, scheduling, estimating and supplier-follow-up support potential.
Perth Renovations Co	Stewart Rawson, Owner	Renovation builder with likely estimating, scheduling, client update and project admin pressure.
Danny Hellwig Electrical	Danny Hellwig, Managing Director	Commercial and industrial electrical contractor with job admin, scheduling and documentation support potential.
Mason Electrical	Tom Mason, Managing Director and Operations Manager	Electrical contractor with quoting, project coordination and compliance-document support potential.
Rayco Plumbing Contractors	Grant Raynor, Managing Director	Residential construction plumbing contractor with scheduling, builder liaison and job administration pressure.
Morris Infrastructure / Morris Commercial Plumbing	Luke Morris, Managing Director	Commercial plumbing business with project administration and procurement follow-up potential.
Diploma Plumbing	Ron Grant, Managing Director	Plumbing contractor with maintenance, job scheduling and administration support potential.
ADCO Group	Adam Di Placido, Managing Director	Electrical, commercial and fire services group with workflow and documentation support potential.
Modern Home Improvers	Bruce Sertorio, Managing Director	Renovation and home improvement business with estimating and project administration needs.
Renew Renovations & Building	Dean Beament, Owner and Director	Renovation builder with quote preparation, client update and project coordination support potential.
Built WA	Jon Stone, WA Director	WA construction division with document control, tender support and project administration potential.
Into Place	Troy Gorton, Managing Director	Design-focused residential builder and property construction business with admin support potential.
Western Australian Electric Company	Kevin McGinty, Owner	Electrical contractor target for quoting, service coordination and job administration support.
Vantage West Electrical Services & Technologies	Managing Director / General Manager to verify	Commercial, industrial and mining electrical contractor with scheduling, procurement and document support potential. <i>Verify contact.</i>

EXPAND THE LIST

Add **25–35 of your own researched accounts** that fit the profile — surfaced via Sales Navigator, job ads, industry directories and referrals. Aim for ~40–50 accounts for the month.

— Buyers & qualification

Multi-thread each account — reach a senior decision maker for authority and an operational person for the felt pain.

PRIMARY DECISION MAKERS

- Owner · Founder · Managing Director
- General Manager · Director
- Construction / Operations Manager

INFLUENCERS & SECONDARY BUYERS

- Estimating Manager · Head Estimator
- Project / Contracts Manager
- Office Manager · Finance / Admin lead

Qualification questions

Use only what you need — the goal is a meeting, not a full diagnosis.

- Can I ask, are your supervisors or project managers still carrying a lot of the job administration themselves?
- Do quotes, supplier follow-up or job scheduling ever become a bottleneck?
- Do you currently have any offshore or remote admin support in the business?
- Are there any recurring tasks that your local team should not really be doing anymore?

Qualified appointment. Company fits the profile; contact is a decision maker or credible sponsor; at least one confirmed business driver; meeting accepted in the Commercial Manager's calendar with a clear handover note in HubSpot.

— Objection handling — residential building & trades

How to handle any objection. Acknowledge it sincerely, reframe to the business issue, then ask one question that keeps the conversation open. Never argue and never oversell — the goal is a short meeting for the Commercial Manager, not winning the point on the call.

Objection	Response angle
“My jobs are all on-site.”	Absolutely — and we'd never touch the on-site work. What we support is the office trail behind it: quotes, variations, supplier follow-up, scheduling and invoicing. Which of those eats the most of your team's week?
“I tried a VA and it failed.”	That's common, and usually it's a scoping and management problem, not the person. Brainbox is a managed model — we recruit, train, supervise and cover for the role, working inside your systems. Worth seeing how that differs?
“Quoting is too technical to hand off.”	The pricing judgement stays with your estimator — always. What an offshore assistant does is the take-offs, supplier pricing chase, data entry and quote formatting so the estimator prices faster. Would faster quotes win more work?
“Cash flow's tight right now.”	Understood — which is often the reason to look. Chasing invoices and job-costing is exactly the work an offshore role tightens, and it costs a fraction of a local admin hire. Happy to compare the numbers.
“We're too small for this.”	Many of our building clients are 15–40 people. One part-time offshore role removes the admin an owner or supervisor is doing after hours — without building a bigger local team.
“Just send me information.”	Happy to — it may be more useful to first know whether estimating, scheduling or invoicing is the bigger pressure, so I send the right example. Which one is it?

Know when to stop. A clear "no" frees time for better-fit accounts. Close the loop kindly, set a nurture date if there's a future trigger, and respect every opt-out immediately.

— First-touch email

Sent from Brainbox / the Commercial Manager with the Industry Insight Article attached. The Associate follows up by phone within a few days.

SUBJECT · PRACTICAL OFFSHORE SUPPORT FOR WA BUILDERS AND TRADE CONTRACTORS

Hi [First Name]

WA builders and specialist trade contractors are carrying more administrative pressure than many businesses realise. Quoting, take-offs, supplier follow-up, project scheduling, variation tracking, invoice chasing and client updates all compete with the work that actually protects margin on site.

Brainbox works with Australian businesses to place dedicated offshore personnel from our delivery centre in the Philippines. For builders and trade contractors, the strongest use case is not replacing site-based people. It is giving owners, supervisors, estimators and project managers reliable support for the work that slows them down between jobs.

We have attached an Industry Insight Article that looks more closely at the labour and capacity issues affecting this part of the market. It also outlines how offshore project administration, estimating support, scheduling assistance and procurement follow-up can help a business improve throughput without adding another senior local hire.

The relevant opportunity for [Company] may sit in one or two specific pressure points. It may be quote turnaround, project admin, supplier coordination, job-costing support, maintenance administration or CRM discipline.

Someone from Brainbox will be reaching out over the next few days to see whether we can schedule a short meeting with our Commercial Manager. The purpose would be to discuss whether offshore support could remove some of the recurring administrative load from your local team.

Kind regards

[Sender Name] · Brainbox

— Lead generation call script

A structured prompt to secure a 20-minute meeting for the Commercial Manager — not to sell the service on the call.

OPENING

Hi [First Name], this is [Caller Name] from Brainbox in Perth. We work with Australian businesses to place dedicated offshore staff through our delivery centre in the Philippines. I am calling because we sent through an Industry Insight Article on labour and administration pressure in WA building and specialist trades. I wanted to see whether it would be worth arranging a short discussion with our Commercial Manager.

INDUSTRY RELEVANCE

The reason we are speaking with builders and trade contractors is that the pressure is not only on site. It is also in quoting, take-offs, supplier follow-up, scheduling, variation tracking, job admin, invoice chasing and client updates. Many businesses in the sector do not need another senior local person for that work. They need reliable support around the estimator, project manager, supervisor or owner.

QUALIFICATION

Can I ask, are your supervisors or project managers still carrying a lot of the job administration themselves? Do quotes, supplier follow-up or job scheduling ever become a bottleneck? Do you currently have any offshore or remote admin support in the business? Are there any recurring tasks that your local team should not really be doing anymore?

MEETING ASK

The useful next step would be a 20-minute discussion with our Commercial Manager. The purpose would not be to push a generic offshore solution. It would be to identify whether there is a defined role in your workflow that could be supported offshore. Would [day/time] or [day/time] suit for that discussion?

LINKEDIN CONNECTION NOTE (OPTIONAL FIRST TOUCH)

Hi [First Name], I work with WA residential building & trades businesses on offshore estimating support & take-offs, procurement admin, supplier follow-up support. Noticed [Company]'s work — would be good to connect.

— Follow-up sequence

First touch opens the door; the follow-ups win the meeting. Each adds a new angle — never resends the same message. Stop the sequence on any reply, opt-out or "do not contact".

Touch	Purpose
1 · Day 1	First-touch email + Industry Insight Article (previous page).
2 · Day 2–3	Phone call using the script; LinkedIn connection request if not already connected.
3 · Day 5	Value follow-up email — one specific angle from the proposition page.
4 · Day 9	Second call + short LinkedIn message with a relevant proof point.
5 · Day 14	Close-the-loop / breakup email — polite, no pressure, easy to reopen.
Day 45+	Move to nurture; revisit on a new trigger (hiring, growth, new work).

TOUCH 3 · VALUE FOLLOW-UP EMAIL

Hi [First Name], following my note on offshore support for builders — the pressure point most WA firms raise first is quote turnaround. Getting take-offs, supplier pricing and quote formatting off the estimator's desk usually gets quotes out days faster. Would a short call with our Commercial Manager be worth 20 minutes to see if it fits [Company]?

TOUCH 5 · CLOSE-THE-LOOP / BREAKUP EMAIL

Hi [First Name], I don't want to keep landing in your inbox. If offshore admin, estimating or scheduling support isn't a priority right now, no problem at all — I'll close the loop. If it's just bad timing, tell me when to circle back and I will. Either way, the Industry Insight Article is yours to keep.

Multi-thread, don't spam. Space the sequence across the month and vary who you contact within an account — never several identical messages to one firm in a day.

— The four-week plan

One month, carried by the Associate. Front-load research and first touches; protect the back half for conversion and booking.

Week 1

Verify the 15, research +25–35, map buyers & triggers, load HubSpot, send first email wave with the Insight Article.

Week 2

Call wave on emailed contacts, LinkedIn connects & engagement, follow-up wave 1, begin booking meetings.

Week 3

Second first-touch wave to remaining & researched accounts, multi-thread Tier 1, convert warm replies, referral asks.

Week 4

Conversion push, confirm & hand over booked meetings, reactivate non-responders, clean data, write month-end report.

Focus	What "good" looks like each week
Research	Every account verified, tiered and tagged Campaign 01; buyers mapped with a named trigger.
Outreach	Personalised first touches with the Insight Article attached; one strong reason per message.
Calls	Priority order: warm replies, accepted connections, openers, Tier 1 decision makers.
Booking	Two specific times offered; invite sent immediately; handover note in HubSpot for the Commercial Manager.

Cross-reference the core cadence. This campaign runs inside the weekly rhythm from the Demand Generation Playbook — campaign touches count toward the Associate's standard first-touch, follow-up, call and conversation targets, and campaign-sourced meetings count toward booked and held appointments.

Commercial Manager handover note

Complete this in HubSpot for **every** booked appointment. It is what turns a booking into a converted meeting — the Commercial Manager walks in already knowing the pain, the room and the angle.

Company & size	
Contact, role & who else is in the room	
Trigger (why now)	
Pain hypothesis	
Offshore-suitable roles identified	
Recommended angle / entry product	
Software & systems in use	
Objections raised & responses	
"Do not say" / sensitivities	
Meeting date, time & format	

DO INCLUDE

- The exact words the prospect used about their pain
- The specific trigger you found
- One clear recommended entry product

AVOID

- Over-promising scope or pricing
- Vague notes like "keen, wants to chat"
- Booking without confirming the decision maker attends

Monthly targets

The benchmark is appointments *held* with a good-fit residential building & trades prospect, not activity alone.

40-50 Target accounts worked (15 supplied + research)	100-140 Contacts researched & enriched	40-50 First-touch emails with Insight Article	120-160 Follow-up actions across the month
80-120 Calls to priority & warm contacts	20-30 Live conversations / two-way exchanges	10-15 Warm opportunities created in HubSpot	6-10 Qualified appointments booked for the Commercial Manager

FINAL SUCCESS MEASURE
Appointments that convert into **sales opportunities** and ultimately a **commercial transaction**. Every metric above is a leading indicator of that single revenue outcome.

Residential Building & Trades — outcomes

Completed by the Associate and reviewed with the sales lead / Marketing Manager at month-end.
