

The bookkeeper capability map

The same five-level trust model, mapped to the bookkeeping function. Read each row left to right — from routine, reviewed work to fully delegated, fiduciary responsibility. Choose the level to start at, and raise it as confidence builds.

FUNCTION trust grows →	1 Reliable hands Routine entry, reviewed	2 Standing access Recurring ledger access	3 Gatekeeper Runs & filters the function	4 Delegated authority Approves within limits	5 Full trust Signs off & advises
Accounts payable Bills & suppliers	- Enter supplier bills and file receipts - Match invoices to purchase orders - Set up new suppliers in the system - Scan and attach source documents	- Manage the bill inbox and code expenses - Prepare payment runs for approval - Reconcile supplier statements - Track due dates and early-payment discounts	- Own the AP ledger and supplier queries - Chase credit notes and resolve disputes - Manage the approval workflow - Keep aged payables clean and current	- Approve payments within agreed limits - Negotiate terms and manage cash timing - Release scheduled payment batches - Set supplier payment policy	- Authorise the full payment run in your name - Steward supplier relationships and controls - Own the AP control environment - Safeguard against duplicate and fraudulent payments
